

Contents of Volume 17

雑誌名	Tohoku journal of agricultural research
巻	17
号	4
ページ	xi-xii
発行年	1967-03-30
URL	http://hdl.handle.net/10097/00099058

Contents of Volume 17

Agronomy

- H. Ito, T. Saito and T. Hatayama:
Time and temperature factors for flower formation in cabbage. II. The site of vernalization and the nature of the vernalization sensitivity 1
- J. Masui, S. Shoji and N. Uchiyama:
Clay mineral properties of volcanic ash soils in the northeastern part of Japan 17
- N. Matsuyama and T. Misawa:
Studies on the hypertrophic disease caused by *Taphrina* species. IV. Production of auxins and hemiauxin by pathogens 37
- N. Matsuyama and T. Misawa:
Studies on the hypertrophic disease caused by *Taphrina* species. V. DNA level of nucleus in the infected tissue 109
- Y. Ehara and T. Misawa:
Studies on the infection of cucumber mosaic virus. III. Time of the infection after inoculation with whole virus or with viral nucleic acid 193
- U. Mizushima and S. Tsunoda:
A plant exploration in *Brassica* and allied genera 249

Animal Husbandry

- Y. Oki, M. Takeda, M. Manda and S. Nishida:
Genetic and physiological control of esterases in experimental small animals. I. Inheritance of serum esterase in mice 51
- Y. Oki and K. Miura:
Genetic and physiological control of esterases in experimental small animals. II. Inheritance of liver esterase in mice 57
- T. Tsuda:
Effect of hydrogen ion concentration on absorption rate of acetic acid through rumen wall 61
- Y. Kondo:
The functional morphological studies on the fundic glands. I. Histological study with special reference to the length, branching, and parenchymal cell ratios of the glands 65
- O. Itikawa, S. Kusuhara, T. Hoshino and K. Hata:
Pathological studies on the caprine osteodystrophia (Report I), especially on the lesions of the osteogenesis and osteolysis (calcification and decalcification) in the bone matrix of the mandibular bone of the experimental osteomalacia of the goats by the time-recording method using lead acetate as the vital stain 117
- Y. Kondo, H. Tamate and O. Itikawa:
The functional morphological studies on the fundic glands. II. The quantitative distribution of the three main cell types 161
- Y. Oki, M. Manda, M. Takeda and S. Nishida:
Genetic and physiological control of esterases in experimental small animals. III. Hormonal regulation in the activities of pseudocholinesterase isozymes 201
- M. Manda and Y. Oki:
Genetic and physiological control of esterases in experimental small animals. IV. Sex hormone-dependent esterases in mouse and rat kidneys 211
- O. Itikawa, H. Tamate, T. Hoshino, K. Ishida, S. Yoneya, K. Goto, S. Yamamoto, A. Suzuki, K. Ooiye, M. Itoh, Y. Kawabe, K. Hata, T. Sato, T. Yamaguchi, S. Kusuhara, T. Kikuchi, K. Minegishi, T. Yoshimoto and H. Onoh:
Physio-histological studies on the physiological obesity of meat pigs, (Report IX),

especially on the occurrence of glycogen within the nuclei and cytoplasms of the zona reticularis in the adrenals of wild boars and Landrace meat pigs in comparison with that of Yorkshire- and Landrace F ₁ - meat pigs, Yorkshire piglets, Yorkshire pigs immunized with hog-cholera virus, and other pigs	215
S. Inooka:	
In vitro uptake of DNA of immunologically competent lymphoid cells by L cells	279

Fisheries

K. Mori, H. Tamate and T. Imai:	
Histochemical study on the change of 17 β -hydroxysteroid dehydrogenase activity in the oyster during the stages of sexual maturation and spawning	179
T. Nomura and Y. Tsuchiya:	
Verdohaemochrome formation by fish. I. Formation by the liver of saury, <i>Cololabis saria</i> (Brevoort)	235
K.C. Hong and Y. Tsuchiya:	
Studies on the transparency of agar-gel	241
K. Mori:	
Histochemical study on the localization and physiological significance of glucose-6-phosphate dehydrogenase system in the oyster during the stages of sexual maturation and spawning	287

Agricultural chemistry

M. Kadowaki and A. Fujiwara:	
The incorporation of H ₃ P ³² O ₄ and P ³² labeled RNA into various cellular fractions of rice seedlings	81
K. Torii and A. Fujiwara:	
Physiology of sulfate on higher plants. II. Uptake and translocation of radioactive-sulfate in sulfur deficient plants	89
M. Tsutsumi and A. Fujiwara:	
Growth and copper uptake of rice and barley plants with varying copper supply	101
Y.H. Kang, A. Fujiwara and K. Ohira:	
Studies on the nitrogen metabolism of soybeans. I. Variation of metabolites during the growth of younger plants	303
